Conditions for the Importation of feeds and feeding stuff

It is hereby stated that no dung or fertilizers containing animal products shall be imported into the territory except under conditions specified by the Veterinary Authority.

- (1) No feeding stuffs for animals containing animal matter shall be imported from any country other than those specified in the Thirteenth Schedule and must be accompanied by a certificate from the Overseas Veterinary Authority of the country of origin stating:-
 - (a) That it originates from a country in which Foot and Mouth disease has not occurred within the six months immediately preceding the date of exportation; and in the case of bone meal, that it has been heated in moist heat to a temperature of two hundred and fifty-seven degrees Fahrenheit at a pressure of nineteen and one half pounds weight per square inch for a continuous period of not less than forty-five minutes.
